Website Information

Our project is a website created through Joomla, so we don't have any code that needs to be analyzed.

The site can be found at tanainacdc.com.

When you enter our site there is basic information available to the public and then several different types of users that can access the site. We have created a user name and password for each possible test case and these can all be used to access what each user level has permissions for:

Teachers (one for each class at Tanaina):

Username: moose

Password: moose

Username: panda

Password: panda

Username: honeybee

Password: honeybee

Username: stinkbug

Password: stinkbug

Username: duck

Password: duck

Parent:

Username: Parent

Password: Parent

Teachers each have access to their class' newsletters and a group calendar (that is currently empty).

Parents can view Announcements and the news for every classroom at Tanaina.
